

Jamafa universal grading machine with discharge conveyors for Amaryllis

Jamafa wishes you a Merry Christmas and a happy 2019!

2018 is coming to an end and we want to wish you happy holidays and a happy 2019 on behalf of the entire Jamafa team.

We want to thank you for the confidence in 2018 and we hope to be able to serve you satisfactorily again in 2019.

We are closed from 24 December 2018 until 1 January 2019.

NEW Universal grading machine for Amaryllis

With this machine it is possible to sort on various criteria.

Think for example of:

- Length of the flower
- Ripeness of the flower
- Size of the flower
- Volume of flower (weight)

This machine is equipped with a very user-friendly control system. The measured values of the product (numbers, sorting ratios and insert performance) are displayed directly on the touchscreen monitor.

Have a look on <https://youtu.be/5eORG4P5bY4> or <https://youtu.be/-m7oT4OnNqC>

NEW Dual length grading machine

This machine has dual coloured trays, blue and white.

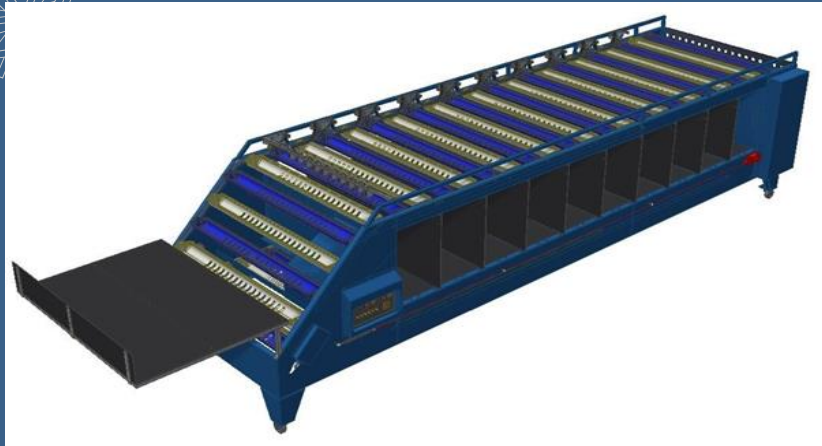

The blue coloured trays will grade in the first 5 stations.

The white coloured trays will grade in the last 5 stations.

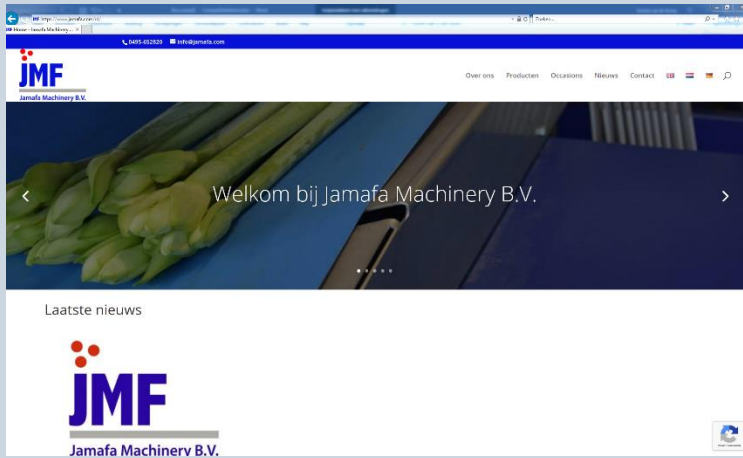

By this system a manual grading step is added to optimize the grader.

The operator could split different flowers or qualities at the loading position.

Available with 1 or 2 loading tables.

New website Jamafa – www.jamafa.com -

Jamafa has introduced a new website

Jamafa Machinery BV has had a new website since December.

On our website you can find a lot of information about our products and possible applications.

Our innovations are also regularly published, so you are always up-to-date with the latest developments.

The website will be further optimized in the coming period.

We look forward to seeing you on our website.

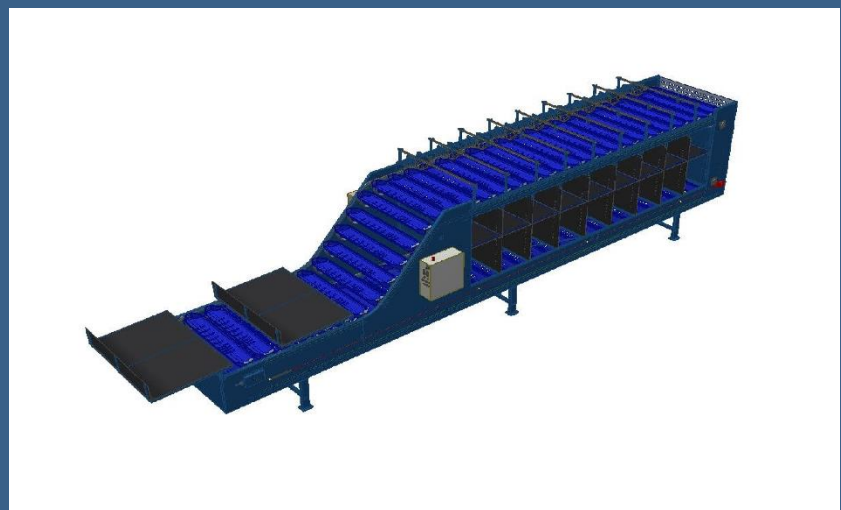

Jamafa length grading machine for volume products

Sorting machine of the new generation for sorting volume products.

The machine is built on the frame of a 9-stations universal sorting machine, so that wide sorting trays can be used, so that more volume fits in the sorting boxes.

The machine is equipped with user-friendly controls.

This machine is particularly suitable for processing for example; ilex, snowballs or other large volume products sorted by length and volume.
